

MAREX 440 Scandinavia

CONCEPT OVERVIEW

“
Excellence beneath
every wave”

Cruising **redefined**

The Marex 440 Scandinavia is a versatile, all-weather cruiser designed for family enjoyment. With dining areas both inside and outside, generous accommodations with either a two- or three-cabin layout, and smart access to decks, the Marex 440 Scandinavia combines comfort and luxury elegance.

The bow area is equipped with a large sunpad with an adjustable backrest (chaise longue mode). Also, this mattress floats on water! Use it as a watertoy, as it can carry several people. The bow anchor box is equipped with a large flip-out bow sprit, allowing easy front access to land.

Hydraulic platform

The innovative swim platform creates an inviting beach club at water level. When lowered, a wide bathing ladder automatically appears, making it safe and easy to step in and out of the water. The aft benches offer a comfortable place to relax and are also designed for practical storage of water toys, fenders, and ropes. The optional integrated davit system folds up to lift and launch a tender effortlessly.

Designed with comfort and flexibility in mind, the salon of the Marex 440 Scandinavia features a smart layout that adapts to every occasion. A corner sofa with two pull-out stools surrounds a foldable dining table, while a clever reversible co-pilot seat allows you to accommodate extra guests with ease.

The salon opens seamlessly into the aft cockpit, and it creates one connected social space. An electrically operated window and sliding glass door between indoor and outdoor areas help maintain a comfortable temperature with an air conditioning or a heating system to extend your season in different climates.

Crafted for **easy living**

Co-pilot seat

This clever reversible seat easily transforms into part of the dining area, adding flexibility to the salon layout. A flip-out table and integrated storage even allow it to double as a portable office. Whether you're sharing a meal or would like to navigate with the captain, this multifunctional co-pilot seat adapts to every moment on board.

Pull-out stools

These two pull-out stools may quickly become your children's favourite spot—or a practical seat for extra guests. Simply slide them out and adjust the height as needed, then tuck them away under the table when not in use. On lazy days, it's a perfect footrest.

Discreet TV

A ceiling-integrated fold-down TV stays hidden until needed. Then it flips down and can serve the salon or the outside cockpit—a perfect blend of functional design and seamless onboard entertainment.

Galley

The kitchen on the Marex 440 Scandinavia is designed for long-term cruising, offering all the comforts of home. It includes a Miele oven and induction cooktop, a double sink, and generous storage. A fridge of 220L /7.8 cu.ft and a freezer of 100L /3.5 cu.ft provide exceptional capacity for extended journeys or social events. Optional solar panels make living onboard easy by powering the units away from the marina.

Powered by **Miele**

- Oven and induction cooktop Miele (requires generator)
- Double sink
- Fridge 220L /7.8 cu.ft
- Freezer 100L /3.5 cu.ft
- Corian countertop
- Optional solar power up to 1500 W for light and fridges
- Smart storage solutions throughout

MAREX

KING OF THE SEA

Smart Cockpit Canopy

An innovative enclosure and sliding roof cover the aft cockpit in seconds. You can quickly turn the boat from completely open to a closed one. Just pull the canopy sides from storage and slide them like curtains. Block the wind on one or all sides or create full shade over the cockpit.

Aft Cockpit

The open aft cockpit of the Marex 440 Scandinavia is made for socialising. A large U-shaped sofa wraps around the dining table, with an extra-long sofa on the starboard side. It's a perfect space for families and friends to relax and enjoy the sea. Lower the table, and it turns into a comfortable sunbed.

CABIN OPTION

Two-cabin version

Perfect for couples or families seeking extra space and privacy. Both layouts offer a bright and airy interior, thanks to skylights, panoramic windows, and opening sections. The two-cabin version offers a larger master bathroom and a more spacious midship cabin.

Forward Cabin

It offers a 1.70 x 2.00m/67" x 79" king-size bed and a spacious bathroom with a separate shower (0.9 x 1.30 m/35" x 51"). Two large wardrobes and an additional four drawers under the bed make it ideal for extended cruising.

Midship cabin

The full-beam guest cabin can offer a huge size bed of 1.80 x 2.00m/71" x 79", a private en-suite head with shower, a cosy sofa bed by the window, and a changing area. It can also be equipped with a washer/dryer machine.

CABIN OPTION

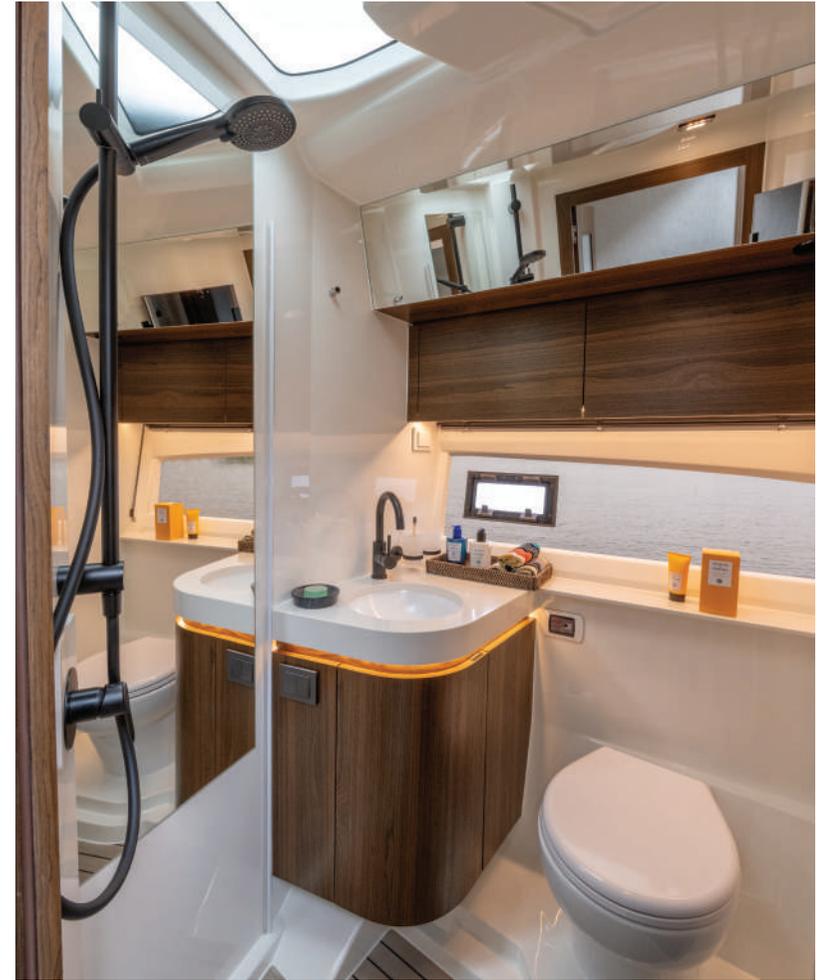

Three-cabin version

Marex offers several luxury interior finishes and materials in both versions, including modern light wood or classic dark walnut, as well as beige and sand grey surface finishes.

Master Cabin

For families cruising with children or a group of friends, the three-cabin version offers smart, efficient use of space. The master cabin features the same generous king-size bed 1.70 x 2.00m/67"x 79", accompanied by its private bathroom (no separate shower cabin).

Guest cabins

Two midship guest cabins—one with a double bed, the other with a single berth and a convertible bed sofa—share a second bathroom. This efficient layout comfortably hosts multiple guests and can be specified with a washer/dryer machine.

Power choices

Marex 440 Scandinavia offers a choice of propulsion systems to match different cruising areas and styles. Whether you prefer IPS, sterndrives, or shaft V-drives, all configurations are powered by the Volvo Penta D6.

Sterndrive (DPI). Responsive handling with a sportier feel at cruising speed. The sterndrives can be lifted for shallow waters.

Max speed: 31-32 knots* (2x D6-440 HP DPI)

IPS. Precision joystick manoeuvring, fuel efficiency and the highest top speed.

Max speed: 35-36 knots*

Reverse V-Shaft. Traditional inboard feel with a robust torque and easier maintenance.

Max speed: to be confirmed.

* Based on independent sea trials and may vary depending on engine configuration, load and conditions. Results are indicative and not guaranteed.

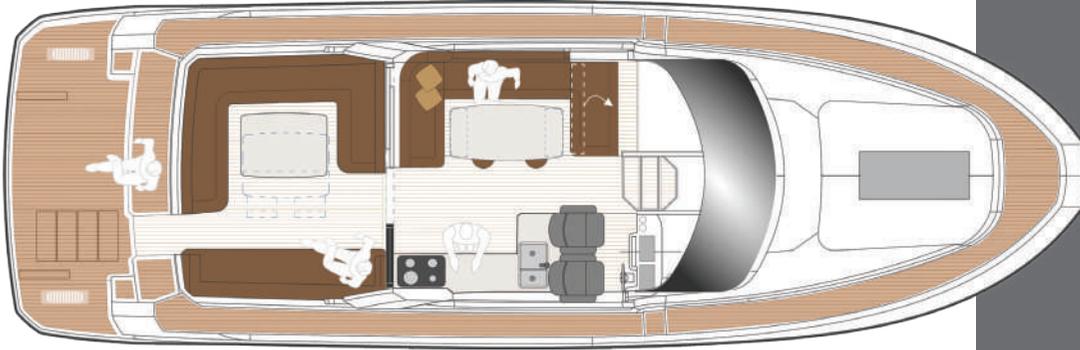

Smart Control & Stability

The helm has two 16-inch screens that monitor boat systems, engines, and navigation. You can also find a few innovations here, such as an adjustable steering column and a unique anchor system which let the captain moor alone, thanks to the ancor camera.

The optional VP Dynamic Positioning System enables the boat to maintain its position at sea—ideal when preparing fenders or stepping away from the helm for a short moment.

The boat is equipped with Humphree interceptors, delivering optimal lift and trim control for a smooth and efficient ride. The system is ready for upgrades.
